DSM offers many 'fractional' sized blocks to reduce the need for on-site cutting. However to maintain better colour consistency It is recomended to cut on-site. DSM Architectural Masonry products are manufactured from natural materials and will vary in colour and texture from batch to batch. All products must be ordered at the one time to ensure that they are supplied from the same batch. Product should be blended from different pallets to ensure an even mix of colour throughout any given wall. If it is not possible to order for a project at one time, keep a few pallets from your previous order and blend in with new stock.

Claims:

All product must be inspected prior to installation to ensure satisfaction of colour and texture. No claims will be will be accepted once product have been installed.
